The RodeXit™ seals are:

- Highly rodent resistant.
- Easy and fast to install.
- Durable.
- Labor-saving and cost-effective.

The RodeXit rodent proofing seals are made of heavy-duty Santoprene™ with an embedded gnaw proof barrier of 10 solid stainless-steel wires:

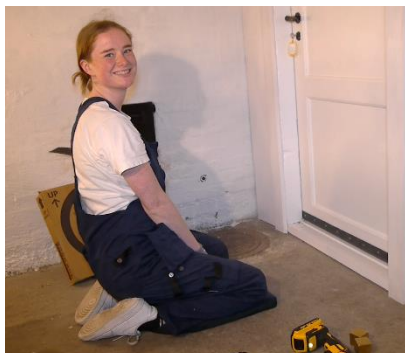

The embedded steel barrier stripped from Santoprene™

For pest and weather proofing:

- Threshold gaps of garage doors.
- Threshold gaps of hinged swing doors.
- Astragal gaps of double swing doors.
- Stationary gaps.

“The RodeXit seals are amazing and very cost effective. It is so much easier.”

Kyle Kilgore, Men in Black Pest Control Services

She can easily rodent proof a door in 2 minutes and 25 seconds.

How fast are you?

RodeXit seals can be installed by means of screws and washers:

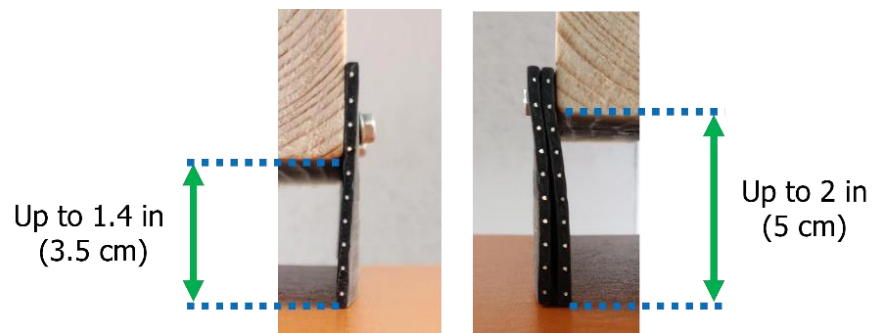

They can also be installed by means of a mounting strip of your choosing or a kickplate:

A single layer is normally sufficient. A double layer can be installed if the rodent pressure is very high or if a particularly high degree of protection is required.

A single layer can proof up to 1.4 in (3.5 cm) wide gaps. A double layer can proof up to 2 in (5 cm) wide gaps.

The RodeXit seals can even be used for proofing wall holes with through-going pipes or cables:

On www.rodexit.com you can find information on how to buy the RodeXit products.
